Adams Edge Apartments

Material: Aluminum

Images - <https://www.adamsedgeapts.com/>

Project Overview:

Built in 2020 and located in Cincinnati Ohio, Adams Edge is designed to perfectly balance the historical look and feel of Mt. Adams with the finishes and amenities of modern luxury living. As Mt. Adams' first LEED certified apartment community, Adams Edge was designed to save water and energy while reducing carbon emissions.

A custom aluminum structure, designed by Daley Design and manufactured by Structureworks encompasses the community deck creating a unique focal point adjacent to the Cincinnati skyline. This factory manufactured structure was quickly assembled on-site providing a savings in both time and man power. Plus its factory finish is highly durable requiring less maintenance over its lifespan.

Challenges:

- Complement the building aesthetic and design
- Provide safety, style and dependability
- Minimal maintenance and repairs
- Extend architectural interest in key location

Solutions:

- Structures finished to match the building exterior
- Fully engineered design for structural integrity
- Aluminum design provides strength and durability
- Unique design highlights the residents common area
